

Course Syllabus

The Name of the Course: GPS and Geocaching – Teaching 21st Century Skills

The description of the course: This course takes you from the basics of how to use a GPS (Global Positioning System), to actually going on a Geocache Treasure Hunt—then to how to create your own course curriculum. Geocaching in the classroom gets kids moving, teaches Technology Skills, teaches Job Skills, encourages Project-based learning and can be used for almost any subject.
